Based on three hundred civil and criminal cases over four centuries Elizabeth W. Mellyn reconstructs the myriad ways families communities and civic and medical authorities met in the dynamic arena of Tuscan law courts to forge pragmatic solutions to the problems that madness brought to their households and streets in some of these cases solutions were protective and palliative in others they were predatory or abusive the goals of families were sometimes at odds with those of the courts but for the most part families and judges worked together to order households and communities in ways that served public and private interests for most of the period Mellyn examines Tuscan communities had no institutions devoted solely to the treatment and protection of the mentally disturbed responsibility for their long term care fell to the family by the end of the seventeenth century Tuscans like other Europeans had come to explain madness in medical terms and the mentally disordered were beginning to move from households to hospitals in mad Tuscans and their families Mellyn argues against the commonly held belief that these changes chart the rise of mechanisms of social control by emerging absolutist states rather the story of mental illness is one of false starts expedients compromise and consensus created by a wide range of historical actors

drawing on a wide range of sources including interdiction procedures records of criminal justice documentation from mental hospitals and medical literature this book provides a comprehensive study of the spaces in which madness was recorded in tuscany during the eighteenth century it proposes the notion of itineraries of madness which intended as an heuristic device enables us to examine records of madness across the different spaces where it was disclosed casting light on the connections between how madness was understood and experienced the language employed to describe it and public and private responses devised to cope with it placing the emotional experience of the tuscan families at the core of its analysis this book stresses the central role of families in the shaping of new understandings of madness and how lay notions interacted with legal and medical knowledge it argues that perceptions of madness in the eighteenth century were closely connected to new cultural concerns regarding family relationships and family roles which resulted in a shift in the meanings of and attitudes to mental disturbances
